A first in France, the blockade of eight illegal IPTV services

To the initiative of ALPA, right-holders from the cinema and audiovisual industry, the broadcasters and the CNC have obtained an injunction blocking eight illegal IPTV services.

The court ruled on December 17th, 2020 and is now applied by all ISPs.

These services are located outside of France and let user access thousands of movies, TV shows and documentaries as well as TV Channels, free or paid, for a monthly fee.

The amount of content provided for such a small fee leaves no doubt as to the illegal nature of these services for the end users.

The immediate effect of these actions is that users haven't been able to connect to their services, generally paid in advance.

ALPA will continue these types of actions against other illegal IPTV services.
